**FOR IMMEDIATE RELEASE**

**n|Frame Awarded \$50K Technology Grant from Indiana Economic Development Corp.**  
*Funding will allow IT company to continue to train and certify engineering staff*

**INDIANAPOLIS** (August 12, 2009) – n|Frame, Indiana’s most experienced collocation and data center services provider, has been awarded a \$50,000 Technology Enhancement Certification for Hoosiers (TECH) grant from the Indiana Economic Development Corporation (IEDC). n|Frame, which received the maximum grant award for any one company, will use the funds to continue training and certifying 22 members of its engineering staff.

“n|Frame is one of Indianapolis’ largest IT employers, and recruiting and retaining top technology talent has always been our highest priority,” said Robert J. Alcorn, n|Frame’s chief operating officer. “The state’s funding will allow us to continue meeting our clients’ evolving technology infrastructure needs by ensuring our engineers are trained and certified in the industry’s most current operating systems, virtual offerings and network topologies.”

The TECH Fund is a reimbursement grant program designed to help Indiana companies meet the demands of the new information economy by rapidly increasing the number of certified information technology workers in the state. This program provides financial assistance to companies that are committed to training their employees in the latest information technology skills. Indiana companies receiving TECH funds must be in good standing with state regulatory agencies.

“Our employees are our greatest asset, and it is imperative that we provide them with continued professional and technical development opportunities,” added Alcorn. “This grant supports us in doing that.”

n|Frame has received similar grants from the state in the past, allowing the company to remain at the forefront of the information technology industry.

**About n|Frame**

n|Frame is Indiana’s most experienced high-availability data center and co-location services provider. Companies of all sizes choose to outsource their IT network and application management to n|Frame’s certified IT experts and world-class data center. Outsourcing allows companies to leverage n|Frame’s facility-based managed services to increase profitability and lower operating costs, thereby making their limited operational, capital and human resources go further in today’s unstable economy. n|Frame’s clients receive a secure IT environment and 24/7 engineering support at a fraction of the cost to maintain the same technology and expertise in house. n|Frame is part of a \$30-million national network of data centers owned by Continental Broadband. To learn more about n|Frame, call 317-805-3759 or visit [www.nframe.com](http://www.nframe.com).
