FOR IMMEDIATE RELEASE

**n|Frame Selected as Data Center and Managed IT Services Provider
By the National Federation of State High School Associations**

INDIANAPOLIS (October 21, 2009) – n|Frame, Indiana’s most experienced server collocation and data center services provider, recently added the National Federation of State High School Associations (NFHS) to its ever-growing customer base. The NFHS, an organization that develops and administers education-based interscholastic sports and activities for high schools in every U.S. state, selected n|Frame to provide server hosting for its data and applications. n|Frame also provides managed IT and network monitoring services.

n|Frame provides data center co-location of NFHS applications and data, along with management of the NFHS IT infrastructure, to provide a fully outsourced IT infrastructure solution. n|Frame also offers a robust portfolio of managed IT services, including configuration and 24/7 support of operating systems and servers. This also includes router management, firewall management, switch management, load balancing, VPNs, back-up processes and storage area networks (SANs). In addition, n|Frame is contracted to provide NFHS with business continuity and workplace recovery solutions, in the event of a business interruption.

“We had been using another provider, but we outgrew their system,” said NFHS Director of Information Services Mike Meenan. “We were launching new Web-based applications and projects that were going to increase our IT needs and Internet bandwidth requirements. We selected n|Frame over other global hosting service providers based on the reliability of its computing environments as well as the technical expertise of its staff.”

"We're pleased to add the National Federation of State High School Associations to the n|Frame family," stated Robert J. Alcorn, n|Frame's chief operating officer. "By choosing n|Frame, NFHS is ensured security of its data, a high-availability environment for its mission-critical applications and a scalable solution that will support the organization's expanding IT needs well into the future."

About The National Federation of State High School Associations

Since 1920, The National Federation of State High School Associations (NFHS) has led the development of education-based interscholastic sports and activities that help students succeed in their lives. By establishing consistent standards and rules of competition, the NFHS improves the experience of high school athletes and provides a support network for those who oversee high school sports and activities. In addition to publishing rules of competition for 16 sports, the NFHS also administers fine arts programs in speech, theater, debate and music. In all, NFHS program initiatives reach 18,500 U.S. high schools and serve more than 11 million students involved in athletic and activity programs. For more information, visit www.nfhs.org.

About n|Frame

n|Frame is Indiana's most experienced [high-availability data center](#) and [co-location services](#) provider. Companies of all sizes choose to outsource their [IT network management](#) and [enterprise application management](#) to n|Frame's certified IT experts and world-class data center. Outsourcing allows companies to leverage n|Frame's facility-based managed services to increase profitability and lower operating costs, thereby making their limited operational, capital and human resources go further in today's unstable economy. n|Frame's clients receive a secure IT environment and 24/7 engineering support at a fraction of the cost to maintain the same technology and expertise in house. n|Frame is part of a \$30-million national network of [data centers](#) owned by Continental Broadband. To learn more about n|Frame, call 317-805-3759 or visit www.nframe.com.
