n|Frame Completes SAS 70 Type II Audit

Nationally recognized technology company commissions third-party assessment of its co-location and managed services

INDIANAPOLIS (October 14, 2008) — n|Frame, Indiana's most experienced high-availability data center services provider, announced today the successful completion of its Statement on Auditing Standards No. 70 (SAS 70) Type II audit, relating to their data center co-location and managed services platforms. The independent audit evaluated and examined these n|Frame services over a 12-month period. Specific aspects of evaluation included the organization and administration of n|Frame's data center and managed services, operational and network controls, physical security, environmental controls (such as power and cooling) and managed services controls.

SAS 70 Type II is an auditing standard used by service organizations to proactively disclose internal business processes and security practices to their clients. This third-party examination is performed in accordance with standards established by the American Institute of Certified Public Accountants. n|Frame commissioned Crowe Horwath LLP (formerly Crowe Chizek and Company LLC), one of the top 10 public accounting and consulting firms in the United States, to conduct the independent audit.

"By conducting the SAS 70 Type II audit for both co-location and managed services, n|Frame continues to stand out among our peers in offering proof of our commitment to maintaining superior operational controls and procedures," said Robert J. Alcorn, n|Frame's chief operating officer. "This third-party assessment validates the accuracy and integrity of our services while documenting our high standards and consistent performance. It's just one of the many ways we provide accountability to our clients and assure them that the data and applications they entrust us with are safeguarded 24/7."

To request a copy of the audit, contact Robert Alcorn at 317-805-3759 or rjalcorn@nframe.com.

About n|Frame

n|Frame is Indiana's most experienced high-availability data center services provider. Companies of all sizes leverage n|Frame's \$30 million investment in world-class data centers and facility-based managed services to gain on-demand access to the most reliable computing and network infrastructure available. n|Frame's clients receive a secure IT environment and 24/7 engineering support at a fraction of the cost to maintain the same technology and expertise in house. n|Frame is part of a national network of data centers owned by Continental Broadband. To learn more about n|Frame, call 317-805-3759 or visit www.nframe.com.
